(PERMIT TERMS CONTINUED)

At least one ground water monitor well is to be installed within the place of use at a location satisfactory to the State Engineer. The monitor well must be suitably cased, perforated, sealed and capped and must penetrate at least 75 feet below the water table.

The issuance of this permit totally abrogates Permit 49237.

QUESTION 15.

The purpose of this application is to consolidate the water rights previously filed under 53094, 54459, 54692, 54720, and 55682 into one water right permit. This application and the application to change Permit 49199 being filed concurrently will cover the "Will Serve" letters previously sent for the Wildhorse Subdivision development. It is the intent of the applicant to file a letter withdrawing the aforementioned previously filed water rights when the notice is sent by the Division of Water Resources for permit fees for this new application.

Please use maps previously filed under Permit 53095 for the proposed Place of Use, Permit 31222 for the proposed Point of Diversion, and Permit 49199 for the existing Place of Use and existing Point of Diversion.
